Live webcasts of the Company presentations will be available through the investor relations section of the Company's website at www.akerotx.com. Following the live webcasts, archived replays will be available on the Company's website.

About Akero Therapeutics

Akero Therapeutics is a clinical-stage company developing transformational treatments for patients with serious metabolic diseases marked by high unmet medical need, including NASH, a disease without any approved therapies. Akero's lead product candidate, EFX, is a differentiated Fc-FGF21 fusion protein that has been engineered to mimic the balanced biological activity profile of native FGF21, an endogenous hormone that alleviates cellular stress and regulates metabolism throughout the body. EFX is designed to offer convenient once-weekly subcutaneous dosing. EFX is currently being evaluated in two ongoing, 96-week Phase 2b clinical trials: the HARMONY study in patients with pre-cirrhotic NASH (F2-F3 fibrosis), and the SYMMETRY study in patients with cirrhotic NASH (F4 fibrosis, compensated). Screening in the first two of three Phase 3 clinical trials began in September 2023, the SYNCHRONY Histology study and the SYNCHRONY Real-World study. Akero is headquartered in South San Francisco.
